

Extra Smarts.

MyPlace & MyAir add-ons

Smart additions to your system.

Want to make your smart system even smarter? Our Extra Smarts add-ons increase the functionality of your MyPlace or MyAir system, quickly and easily!

MyGarage

Did you or didn't you close the garage? MyGarage cures the nagging doubt and sends a notification to your phone if it is left open. With a tap of the MyGarage app, you can close up to two garage doors from anywhere. Or use voice command - MyGarage integrates seamlessly with Siri, Google Home and Amazon Alexa.

MyGarage turns your existing automated garage door, into a smart garage door.

10" Touchscreen

Upgrade from our standard 8" touchscreen to the premium 10" touchscreen.

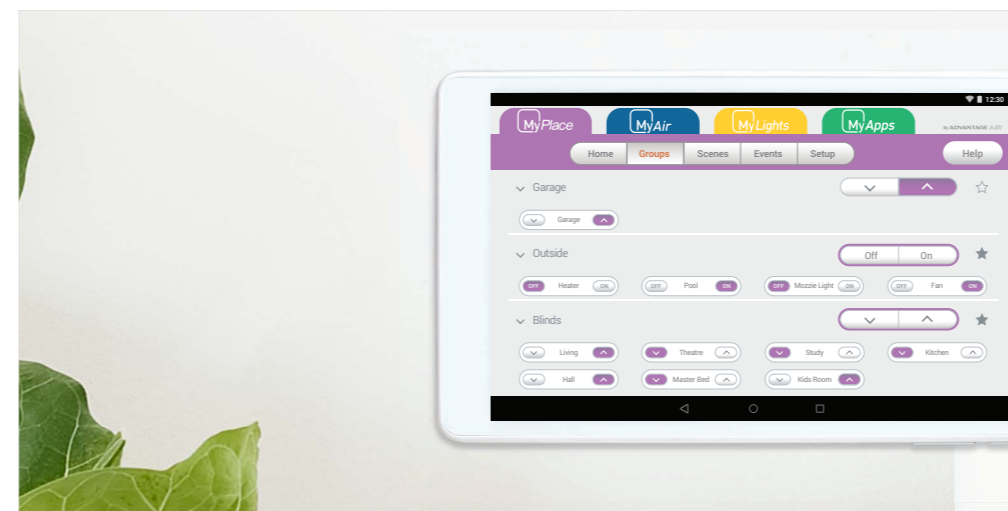

The larger screen will give you enhanced viewing and will make controlling your MyPlace system app and other third-party apps even easier.

MyMonitor

MyMonitor senses changes in motion, temperature and light. With the ability to set up to 20 events, its uses are limited only by your imagination. Set it to send a notification to your phone when the kids get home from school, or when the cleaner arrives and leaves. Schedule it to automatically turn on the air-conditioning when the temperature soars, or light up your home when you walk in.

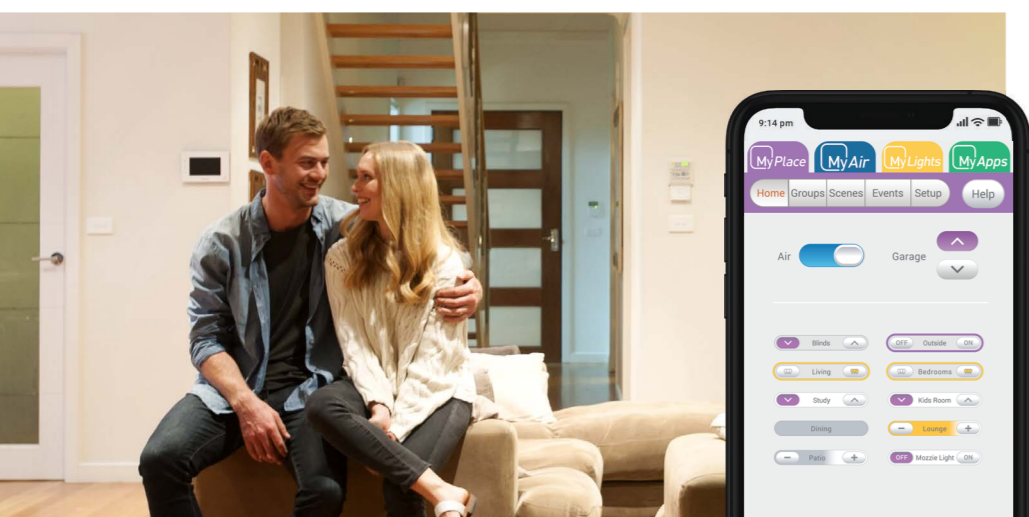

At night feel safer knowing that MyMonitor will notify you of intruders, automatically switch on lights so you can see any danger and possibly even scare them away.

Mirror Screen

A mirror screen is a second wall mounted control point of your smart home system and is ideal if you don't always have your smartphone with you.

Adding a wall mounted mirror touchscreen to a double storey home allows you to have the convenience of a screen on each level. If your home has been built on a narrow lot, you may wish to have a touchscreen at both the front and rear of your home.

MyPlace Dimming Kit

Bright light is great if you're cooking, working from home or doing a jigsaw. It's not so great if you're trying to set the mood for a party, watch a movie or get a little one off to sleep.

With the MyPlace dimming kit, you can adjust the intensity of any light with a tap of your phone or your wall mounted MyPlace control panel.

Additional Modules

The MyPlace system you have been offered is modular so you can easily add modules now or later to make more of your home smart. Control additional lights, air-conditioning, blinds, electric gates or other 240 volt items in your home, the choice is yours.
